

## Virtual Energy Review

We're here to help you with all your energy needs, even when meeting in person isn't an option.

### How it Works

You'll virtually meet with one of our qualified energy efficiency specialists, using the video conferencing software of your choice, and they'll guide you through the Virtual Energy Review process. Our team will take a closer look at your facility's energy usage to identify areas of inefficiency and suggest paths for improvement. At the end of the meeting, you'll be equipped with next steps for improving energy efficiency at your facility.

### How to Prepare:

Make sure you'll have an hour of uninterrupted time at the site in question. It's preferred you do the audit on-site if possible, so our team can virtually inspect any equipment, if necessary.

Use a smartphone or tablet equipped with video conferencing software, and ensure you'll have internet access.

### Benefits

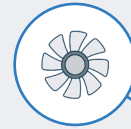

- Understand how the incentive program works, and discuss which incentives you may be eligible to receive
- Review your energy consumption and determine where opportunities exist within your facility
- Receive guidance on efficient technologies
- Get help understanding which projects have the fastest payback
- Get connected with contractors with the right expertise
- Assistance with applying for an incentive

### Eligibility

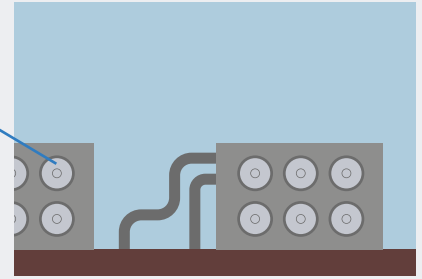

The Business Energy Savings Program is available to Evergy's Missouri business customers.
